

Synergy Launch Courtesy Car Programme

The first initiative of the Synergy Group has now hit the market running. Within 4 hours of the launch of the program 140 of the first batch of 200 courtesy cars have been taken by Synergy's repairer members.

Bucking the current trend of increasing prices, Synergy have secured an overall reduction in rental costs for its members. This is the first of many deals, with car manufacturers, the next of which will see 1,000 units available.

Courtesy cars are the first of many group purchasing initiatives that Synergy will roll out to its members.

Synergy is currently on track with its national network of repairers, with forecast turnover expected to reach £300 million, making Synergy the largest Accident Repair Group in the UK.
